EXPLANATORY NOTES

Introduction

1. This publication contains Victorian labour force estimates derived from the population survey conducted throughout Australia each month by the Australian Bureau of Statistics. Labour force estimates for employed persons classified by industry and occupation are only available quarterly (i.e. each February, May, August, and November).

Conduct of ABS population survey

2. The survey is based on a multi-stage area sample of private dwellings (houses, flats, etc.) and non-private dwellings (hotels, motels, etc.) and covers about one-half of one per cent of the Victorian population. The information is obtained from the occupants by trained ABS interviewers.

Scope of survey

3. All persons aged 15 years and over are included in the survey except:

- (a) members of the permanent defence forces;
- (b) certain diplomatic personnel of overseas governments;
- (c) overseas visitors holidaying in Australia; and
- (d) members of non-Australian defence forces (and their dependants) stationed in Australia.

Definitions

4. The labour force category to which a person is assigned depends on his or her actual activity (i.e. whether working, looking for work, etc.) during the survey week. The definitions conform closely to the standard definitions recommended by the International Labour Organisation.

Employed persons comprise all those aged 15 years and over who, during the survey week:

- (a) worked for one hour or more for pay, profit, commission, or payment in kind in a job or business, or on a farm (including employees, employers, and self-employed persons); or
- (b) worked for 15 hours or more without pay in a family business or on a farm (i.e. unpaid family helper); or
- (c) were employees who had a job but were not at work and were:
 - (i) on paid leave;
 - (ii) on leave without pay for less than four weeks up to the end of the survey week;

- (iii) stood down without pay because of bad weather or plant breakdown, or their place of employment for less than four weeks, up to the end of the survey week;
- (iv) on strike or locked out;
- (v) on workers' compensation or expected to be returning to the job; or
- (vi) receiving wages or salary while undertaking full-time study; or
- (d) were employers or self-employed persons who had a job, business, or farm, but were not at work.

Unemployed persons are those aged 15 years and over who were not employed during the survey week, and:

- (a) had actively looked for full-time or part-time work at any time in the four weeks up to the end of the survey week and were:
 - (i) available for work in the survey week, or would have been available except for temporary illness (including hospitalisation) lasting for less than four weeks; or
 - (ii) waiting to start a new job within four weeks from the end of the survey week and would have started in the survey week if the job had been available then; or
- (b) were waiting to be called back to full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the survey week (including the survey week) for reasons other than bad weather or plant breakdown.

The labour force comprises all persons aged 15 years and over who, during the survey week, were employed or unemployed, as defined above.

The unemployment rate is the number unemployed in each group as a percentage of the labour force in the same group.

The participation rate is the labour force in each group as a percentage of the civilian population aged 15 years and over in the same group.

Full-time workers are those who usually work 35 hours a week or more and others who, although usually part-time workers, worked 35 hours or more during the survey week.

Part-time workers are those who usually work less than 35 hours a week and who did so during the survey week. When recording hours of work, fractions of an hour are disregarded.

Hours of work. The figures of aggregate hours and average hours refer to actual hours worked during the survey week, not hours paid for.

Persons not in the labour force are those who, during the survey week, were not in the categories 'employed' or 'unemployed'.

Marital status. In the labour force survey, persons are classified as married or not married. Marital status is determined from information supplied by the respondent about the individual himself or herself and, where the person was reported as being married, about the living arrangements of persons usually resident in the household.

Revision of series

Survey estimates are not revised for the usually small amendments of population benchmarks arising from new data on deaths and overseas and internal migration. Revisions are made, however, after each Census of Population and Housing, and when population estimation phases are reviewed.

Status of worker

Status of worker is classified by occupational status, i.e. whether they were employers, self-employed persons, wage and salary earners (employees), or unpaid family helpers (who worked 15 hours or more in the survey week).

Classification of Industry and occupation

Industry is classified according to the Australian Standard Industrial Classification (ASIC), 1983 and occupation according to the Classification and Classified List of Occupations, Revised June 1981.

Victorian regions

Maps of the labour force regions are presented at the end of this publication. More detailed maps and a list of the component local government areas and/or statistical divisions in each region can be found in Information Paper : Victorian Labour Force Statistics (6262.2).

Reliability of estimates

Since the estimates in this publication are based on information obtained from occupants of a sample of dwellings they, and the movements derived from them may differ from the figures that would have been produced if all dwellings had been included in the survey. One measure of

the likely difference is given by the standard error of an estimate. Standard errors of survey estimates and month to month movements calculated for all regions are shown on page 21. As the above problems are compounded when the statistics are disaggregated to regional data, users are particularly advised to treat month to month movements for regional data with caution. An explanation of standard errors and their use can be found in Section 4 of Information Paper : Victorian Labour Force Statistics, (6262.2).

10. Labour force survey estimates are calculated in a way as to add up to the independently derived estimates of the population aged 15 years and over by age and sex. Regular independent estimates of the population at the regional level are not available for use as benchmarks in the manner described above. Therefore users should not use the data in this publication as a means to calculate the civilian population aged 15 years and over within each region.

Related publications

11. Users may also wish to refer to the following publications, available on request:

The Labour Force, Victoria (6201.2) (monthly)
The Labour Force, Australia, Preliminary (6202.0) (monthly)
The Labour Force, Australia (6203.0) (monthly)
The Labour Force, Australia (6204.0) (annual)
Information Paper: Release of Regional Labour Force Statistics (6262.0)
Information Paper: Victorian Labour Force Statistics (6262.2)

12. Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0) which is available free of charge from any ABS Office.

13. Other unpublished data from labour force surveys on aspects of the Victorian labour force are held by the Victorian Office of the ABS, and may be available on request.

Symbols and other usages

na not available
 nec not elsewhere classified
 .. not applicable
 * subject to sampling variability too high for most practical purposes

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

	All employed persons	41.9	37.0	40.3	27.9	31.9	29.5	36.8	34.8	36.1

(a) Persons with jobs who did not work during the survey week have been included in the calculation of average weekly hours worked. The relative standard errors of these estimates are obtained by first finding the relative standard error of the estimate of the total number of persons in the estimate (see Table A), and then multiplying by a factor of 0.5. For further information see Information Paper : Victorian Labour Force Statistics (6262.2). (b) Comprises health; education, libraries, etc.; welfare and religious institutions; and other community services. (c) Comprises electricity, gas, and water; communication; and public administration and defence.

TABLE 9. EMPLOYED PERSONS: STATUS OF WORKER AND HOURS WORKED, VICTORIA, FEBRUARY 1985
